

ISAC Meeting 16 November

ISAC will be meeting this Friday 16th November. The items being considered are:

1. Wool Pack Standard Review

ISAC will consider the latest results and analysis from the wool pack trials and recommended changes to the Wool Pack Standard.

AWEX has conducted wool pack trials over the past 15 months with the aim of improving the structural integrity of the wool pack and its performance in meeting the 2.5m maximum load width dimension as set out in the road regulations. A key in the progress of this trial has been the support AWEX has received from the NSW Government, the Roads and Maritime Services of NSW and the wool industry.

During this period AWEX has conducted trials over a broad cross section of wool types, sheep breeds, wool clip sizes, wool growing zones and wool press types. The education and extension programs in parallel with this project are critical to its success.

Recommended changes to the wool pack standard will be taken to the AWEX Board for further consideration.

2. Classing House Registration Review

ISAC will also be considering papers and issues related to the Classing House (CH) Rules of Registration and Code of Practice in preparation for the CH Registration in 2013.

A meeting of CH operators was held recently to review the CH Code of Practice and discuss any other operational issues.

If Members would like to raise or discuss any issues with respect to the above items they should contact

Kerry Hansford ISAC Secretary 03 9318 0277 khansford@awex.com.au

Mark Grave 0414 314 705 mgrave@awex.com.au
