| | 4, 5, 6 Shedding Breeds | SB |
| | Carpet Wool | CW |

| Shedding Breeds Definitions | |
|-------------------------------------|--|
| Shedding Breeds | Breeds that shed fibre (e.g. Afrikaner, Australian White, Awassi, Damara, Black Headed and White Dorper, Karakul, Meatmaster, Persian, Van Rooy, Wiltipoll, Wiltshire Horn). |
| Contact with Shedding Breeds | Mated to, or run together since the previous shearing, with shedding breed sheep or their crosses (includes lambs from shedding breed sheep or their crosses). |

By signing this National Wool Declaration, I warrant that (a) I am authorised to complete this declaration & confirm that all details contained in it are true & correct, (b) I authorise the selling agent to submit this document to the Australian Wool Exchange (AWEX), if requested, for the purpose of the Integrity Program & (c) I understand that random desk audits & on farm inspections are undertaken, the results of which may be made available to the buyers of the declared wool & the selling agent. Details of the AWEX NWD - Integrity Program & Privacy Policy are available on the AWEX website: www.awex.com.au

NWD Definitions/Supporting Explanations

Please use the most accurate definition that applies to each mob. Mobs treated with Liquid Nitrogen must be declared as LN.

| NWD Definitions | |
|--|--|
| Non Mulesed (NM) | No sheep in this mob have been mulesed [^] or treated with liquid nitrogen#. |
| Liquid Nitrogen (LN) | Sheep in this mob have been treated with liquid nitrogen#. |
| Analgesic &/or Anaesthetic (AA) | Sheep in this mob have been mulesed [^] with the use of an analgesic &/or anaesthetic product registered by APVMA. |
| Mulesed (M) | Sheep in this mob have been mulesed [^] without the use of an analgesic &/or anaesthetic product registered by APVMA. |

| Supporting Explanations | |
|-----------------------------|--|
| [^]Mulesing | The removal of skin from the breech and/or tail of a sheep using mulesing shears. <i>Source:</i> Australian Animal Welfare Standards and Guidelines for Sheep prepared by Animal Health Australia, V1.0 2016. |
| #Liquid Nitrogen | The application of liquid nitrogen where ultra-low temperatures are used to degenerate tissue and result in the removal of skin from the breech and/or tail of a sheep. |
| Mobs of Mixed Status | For mobs of mixed status, use the lowest applicable status according to this hierarchy, NM > LN > AA > M. For example, declare AA for a mob containing NM and AA sheep, or declare M for a mob containing LN and M sheep. |

Work, Health & Safety: In addition to completing this NWD, the Owner/Manager is also responsible for participation in the Integrity Program, which includes random desk audits and on farm inspections. The Owner/Manager acknowledges and agrees that they will participate in the on farm inspection process in a way that is compliant with health and safety rules and will advise AWEX if a scheduled inspection would be unsafe.
